Dear Ambassador,

Happy New Year to you and your family.

I guess the headlines on cnn.com each day underscore the captioned issues. The "configuration" is changing

The Zazi's and AbdulMutallab's are on the increase - homegrown on US soil.

For some unknown reason, "the deer" stands poleaxed in the rifle scope, unable to move.

Every inroad that I have made to the US government for providing services to address homeland security and this and other related problems are besieged by administrative bureaucracy. While we prevaricate, the enemy is getting more and more strategic ground.

Hindsight, being 20/20, affords us an advantageous view of the efficacy of my patented Global Origin and Destination Information System was sidelined in the early 2000 's see [http://www.patentstorm.us/inventors-applications/David\\_Weekes/4653071/1.html](http://www.patentstorm.us/inventors-applications/David_Weekes/4653071/1.html)

History will prove that my other solution is pertinent and effective NOW! However, once the proverbial horse has bolted from the barn and there is a martyr on every US corner, it is then going to be too late for my solution to work.

The same way Lee Boyd Malvo and Muhammed held the tristate area hostage for those many months in 2002, the US based jihadists will create a new, proximate reality reminiscent of the curfew-like conditions of the tri-state in 2002.

Watch it as it grows.

Best regards,

David
